From the acclaimed and award-winning author of The Hunger comes an eerie, psychological twist on one of the world's most renowned tragedies, the sinking of the Titanic and the ill-fated sail of its sister ship, the Britannic. Someone, or something, is haunting the ship. Between mysterious disappearances and sudden deaths, the guests of the Titanic have found themselves suspended in an eerie, unsettling twilight zone from the moment they set sail. Several of them, including maid Annie Hebley, guest Mark Fletcher, and millionaires Madeleine Astor and Benjamin Guggenheim, are convinced there's something sinister--almost otherworldly--afoot. But before they can locate the source of the danger, as the world knows, disaster strikes. Years later, Annie, having survived that fateful night, has attempted to put her life back together. Working as a nurse on the sixth voyage of the Titanic's sister ship, the Britannic, newly refitted as a hospital ship, she happens across an unconscious Mark, now a soldier fighting in World War I. At first, Annie is thrilled and relieved to learn that he too survived the sinking, but soon, Mark's presence awakens deep-buried feelings and secrets, forcing her to reckon with the demons of her past--as they both discover that the terror may not yet be over. Brilliantly combining the supernatural with the height of historical disaster, The Deep is an exploration of love and destiny, desire and innocence, and, above all, a quest to understand how our choices

can lead us inexorably toward our doom. The electrifying story of Raphael Semmes and the CSS Alabama, the Confederate raider that destroyed Union ocean shipping and took more prizes than any other raider in naval history. In July, 1862, Semmes received orders to take command of a secret new British-built steam warship, the Alabama. At its helm, he would become the most hated and feared man in ports up and down the Union coast—and a Confederate legend. Now, with unparalleled authority and depth, and with a vivid sense of the excitement and danger of the time, Stephen Fox tells the story of Captain Semmes's remarkable wartime exploits. From vicious naval battles off the coast of France, to plundering the cargo of Union ships in the Caribbean, this is a thrilling tale of an often overlooked chapter of the Civil War. On the evening of August 30, 2003, Robert and Melissa Rogers and their four young children were driving home from a family wedding. Caught in a flash flood, Melissa and the children all drowned. Into the Deep is the compelling story of how one man's faith took root and blossomed through trials, blessings, and a deepening trust in God. Containing 97 percent of Earth's water supply, the ocean plays a huge role in regulating global temperatures, supporting plant and animal life, and contributing to the livelihoods of millions of people. But in spite of all this, the ocean remains drastically unexplored, and the details of its impact on human lives aren't fully understood. Scientists from around the world are realizing that to address issues plaguing the ocean, such as dead zones, coral bleaching, and climate change, we need to better understand this incredible, unique feature of our planet. With a range of impressive, cutting-edge technologies at their disposal, oceanographers have set out to measure, sample, and analyze at every turn. Every day, mysteries about the ocean are being solved, and every day, new questions come to light. The more scientists learn, the better they are able to answer these new questions. What lies in the deep? And who is at the forefront of these exciting discoveries? The scientists and research included in this book shed light on the most pressing issues currently facing oceanographers and point us in the right direction to solving these challenges. Something has awoken. Roused from its slumber following an Antarctic ice quake, an immense beast has risen from the depths.

Dwarfing even the mighty blue whale, the gargantuan wonder of evolution takes charge of the oceans, setting a catastrophic chain of events in motion. Henry Rainwater is a rookie crab fisherman trying to shake the family namesake and make his own way in life. After surviving an encounter with the beast which sees his father and the rest of the crew of their family boat killed, Rainwater becomes a recluse, deathly afraid of the creature which lurks in the ocean. The only man that believes Rainwater is Andrews, an ambitious scientist charged by the government to investigate the existence of the creature. Rainwater soon finds out that Andrews has different motivations for locating the beast. Driven to find his redemption and clear his name, Henry must overcome his terror and set out to sea in order to track down and kill the creature, in the hope of finding it before Andrews and his unhinged superior, Russo can put their own plan into action, one which could have terrible repercussions for the entire human race... Octavia E. Butler meets Marvel's Black Panther in *The Deep*, a story rich with Afrofuturism, folklore, and the power of memory, inspired by the Hugo Award-nominated song "The Deep" from Daveed Diggs's rap group Clipping. Yetu holds the memories for her people—water-dwelling descendants of pregnant African slave women thrown overboard by slave owners—who live idyllic lives in the deep. Their past, too traumatic to be remembered regularly is forgotten by everyone, save one—the historian. This demanding role has been bestowed on Yetu. Yetu remembers for everyone, and the memories, painful and wonderful, traumatic and terrible and miraculous, are destroying her. And so, she flees to the surface escaping the memories, the expectations, and the responsibilities—and discovers a world her people left behind long ago. Yetu will learn more than she ever expected about her own past—and about the future of her people. If they are all to survive, they'll need to reclaim the memories, reclaim their identity—and own who they really are. *The Deep* is "a tour de force reorientation of the storytelling gaze...a superb, multilayered work," (Publishers Weekly, starred review) and a vividly original and uniquely affecting story inspired by a song produced by the rap group Clipping. Commit to your niche, own your market, and audaciously scale your agency. A girl searches for a killer on an island where deadly

sirens lurk just beneath the waves in this “twisty, atmospheric story that grips readers like a siren song” (Publishers Weekly, starred review). The sea holds many secrets. Moira Alexander has always been fascinated by the deadly sirens who lurk along the shores of her island town. Even though their haunting songs can lure anyone to a swift and watery grave, she gets as close to them as she can, playing her violin on the edge of the enchanted sea. When a young boy is found dead on the beach, the islanders assume that he’s one of the sirens’ victims. Moira isn’t so sure. Certain that someone has framed the boy’s death as a siren attack, Moira convinces her childhood friend, the lighthouse keeper Jude Osric, to help her find the real killer, rekindling their friendship in the process. With townspeople itching to hunt the sirens down, and their own secrets threatening to unravel their fragile new alliance, Moira and Jude must race against time to stop the killer before it’s too late—for humans and sirens alike. A beautifully illustrated reference providing fascinating insights into the hidden world of the seafloor using the latest deep-sea imaging. Need some new and inventive monsters for your players to battle? Want to have more options for Goblins? How about some undead dinosaurs? All this and more can be found inside *The Book of Monsters!* All creatures in this book are designed using rules for 5e, but can be easily converted to other systems. Take a look, and get your monster on! This is a groundbreaking, highly original work of postmodern feminist theology from one of the most important authors in the field. *The Face of the Deep* deconstructs the Christian doctrine of creation which claims that a transcendent Lord unilaterally created the universe out of nothing. Catherine Keller's impassioned, graceful meditation develops an alternative representation of the cosmic creative process, drawing upon Hebrew myths of creation, from chaos, and engaging with the political and the mystical, the literary and the scientific, the sexual and the racial. As a landmark work of immense significance for Jewish and Christian theology, gender studies, literature, philosophy and ecology, *The Face of the Deep* takes our ordinary story to a new horizon, rewriting the starting point for Western spiritual discourse. Journey into *The Deep* with the daring aquanaut family, *The Nektons*, aboard their state-of-the-art (and oh, so shiny)

submarine, *The Aronnax*. When an earthquake off the coast of Greenland leads to strange reports of monster sightings, William and Kaiko Nekton, along with their kids, Fontaine and Ant (and of course, Ant's pet fish, Jeffrey), dive into the mystery! Will they find what they're looking for? Will they teach a fish to fetch? Will they be accidentally eaten? Find out in the all-ages adventure from #1 New York Times bestselling author, Tom Taylor (*Injustice: Gods Among Us*, *All-New Wolverine*, *Star Wars: Adventures*) and James Brouwer (*Justice League Beyond*). Sapphire lives in two worlds. On land she walks the rocky shores of the Cornwall coast—but under the sea she can swim like a seal by the side of her Mer friend Faro. Now both of Sapphy's worlds are threatened. In the profound depths of the ocean, where the Mer cannot go, a monster called the Kraken is stirring. He has the power to sweep Ingo away and shake the land from its foundation. Because of her mixed blood, Sapphire can enter the Deep. With a great whale as her guide, she will journey to a place so far from the sun, no light can find it—and confront an evil that's even darker. Prayer-- it's mysterious, challenging, frustrating . . . and life-changing. Discover why growing in prayer, which sometimes can be compared to a battle, is worth every ounce of effort you give it. Even if you've never prayed, or if you've never developed the habit of daily prayer, God is waiting to meet you where you are and encourage you every step of the way. Using a simple approach to prayer, you'll learn how even ten minutes a day can change your life. Author Dan Burke explains how to set up your own sacred prayer space, discusses the common obstacles to prayer, and provides practical ways to overcome them. You'll also read stories of others who are seeking to orient themselves to God through prayer. If you're ready for God to transform your heart and mind, you will know the life that Jesus has promised; a life of peace and joy that cannot be taken away by the trials of this world. 'One of the best accounts ever written of deep-water diving and its staggering, haunting dangers' Robert Kurson, New York Times bestselling author of *Shadow Divers* Deep underwater lurks a mysterious man-made illness. It has gone by many names over the years – Satan's disease, diver's palsy, the chokes – but today, medics call it decompression sickness. You know it as the bends. That's the devil British

diver Martin Robson faces each time he plunges beneath the surface. In the winter of 2012, Robson was part of an expedition to Blue Lake, southern Russia, which sought to find a submerged cave system never seen by the human eye. On the final day of the expedition, as Robson returned from diving deeper into the lake than anyone had before, disaster struck: just seventy-five feet down, he was ambushed by the bends. Robson knew that if he continued up to the surface he would probably die before help arrived. Instead, he sank back into the water, gambling on an underwater practice most doctors believe is a suicidal act. Soon the only hope he had of saving his life would rest in the hands of a dramatic mercy mission organised at the highest levels of the Russian government. *Between the Devil and the Deep* is the first book to tell the terrifying true story of what it feels like to get the bends, taking you inside the body and mind of a man who suffered the unthinkable. Writer Mark Cowan also explores the grimly fascinating history of decompression sickness, the science behind what causes the disease, and the stories of the forgotten divers who pushed the limits of physical endurance to help find a solution. The legendary explorer of *Titanic* and *Lusitania* reveals the secret military missions behind his famous exploits and unveils a major new discovery on the occasion of the 35th anniversary of the *Titanic* find. Best known for finding the wreck of the *Titanic*, celebrated adventurer Robert Ballard has a lifetime of stories about exploring the ocean depths. From discovering new extremophile life-forms thriving at 750°F hydrothermal vents in 1977 to finding famous shipwrecks including the *Bismarck* and *PT 109*, Ballard has made history. Now the captain of *E/V Nautilus*, a state-of-the-art scientific exploration vessel rigged for research in oceanography, geology, biology, and archaeology, he leads young scientists as they map the ocean floor, collect artifacts from ancient shipwrecks, and relay live-time adventures from remote-controlled submersibles to reveal amazing sea life. Now, for the first time, Robert Ballard gets personal, telling the inside stories of his adventures and challenges as a midwestern kid with dyslexia who became an internationally renowned ocean explorer. Here is the definitive story of the danger and discovery, conflict and triumph that make up his remarkable life. "To be a naturalist is better than to be a

king." --William Beebe's journal, December 31, 1893 William Beebe was a pioneer in the field of ecology, the father of deep-sea exploration, and an avid conservationist. This picture-book biography charts the life of this famous naturalist from his childhood studying animals in New Jersey through his later years studying birds at the research station he started in Trinidad. Back matter includes quotes from Beebe, a glossary of terms, and an illustrated cross section of the Bathysphere, which Beebe helped design. The Titanic meets the delicious horror of Ransom Riggs and the sass of Mean Girls in this follow-up to the #1 New York Times bestseller *How to Hang a Witch*, in which a contemporary teen finds herself a passenger on the famous “ship of dreams”—a story made all the more fascinating because the author’s own relatives survived the doomed voyage. Samantha Mather knew her family’s connection to the infamous Salem Witch Trials might pose obstacles to an active social life. But having survived one curse, she never thought she’d find herself at the center of a new one. This time, Sam is having recurring dreams about the Titanic . . . where she’s been walking the deck with first-class passengers, like her aunt and uncle. Meanwhile, in Sam’s waking life, strange missives from the Titanic have been finding their way to her, along with haunting visions of people who went down with the ship. Ultimately, Sam and the Descendants, along with some help from heartthrob Elijah, must unravel who is behind the spell that is drawing her ever further into the dream ship . . . and closer to sharing the same grim fate as its ghostly passengers. Praise for *How to Hang a Witch*: “It’s like *Mean Girls* meets history class in the best possible way.” —*Seventeen Magazine* “Mather shines a light on the lessons the Salem Witch Trials can teach us about modern-day bullying—and what we can do about it.” —*Bustle.com* “Strikes a careful balance of creepy, fun, and thoughtful.” —*NPR* “I am utterly addicted to Adriana Mather’s electric debut. It keeps you on the edge of your seat, twisting and turning with ghosts, witches, an ancient curse, and—sigh—romance. It’s beautiful. Haunting. The characters are vivid and real. I. Could. Not. Put. It. Down.” —Jennifer Niven, bestselling author of *All the Bright Places* A stylish picture book about an underwater quest for an elusive, bioluminescent plant perfect for young conservationists and

fans of Wes Anderson's *The Life Aquatic with Steve Zissou*. Fox loves nature, and enjoys discovering strange and fascinating plants. He especially loves the seaside, and often walks the salty coastal trails with his cousin Wolf. One day, Seagull tells the two about an especially interesting underwater plant called the constellation of the deep. According to Seagull, it grows on the bottom of the ocean, but no one knows exactly where, and it glows in the dark. Before long, Fox has donned his diving equipment, including a wet suit, a snorkel, a diving mask, fins and more, and sets off on an underwater quest to find this incredible plant. Along the way, Fox observes many different kinds of ocean life, like crabs, starfish, algae and an amazing array of corals. He also comes across some underwater friends who try to help guide him to the elusive plant. But Fox despairs when he loses his camera -- even if he finds the constellation of the deep, how will he capture this amazing discovery? With spreads of informational content interspersed throughout, *Constellation of the Deep* is a charming picture book featuring the same character from *The Golden Glow* that details the wonders of the underwater world and celebrates observing the beauty of nature. #1 New York Times best-selling author Rick Riordan pays homage to Jules Verne in his exciting modern take on *20,000 Leagues Under the Sea*. From the Jaws blockbusters to Shark Week, we are conditioned to see sharks as terrifying cold-blooded underwater predators. But as Ocean Guardian founder William McKeever reveals, sharks are evolutionary marvels essential to maintaining a balanced ecosystem. We can learn much from sharks, he argues, and our knowledge about them continues to grow. The first book to reveal in full the hidden lives of sharks, Emperors of the Deep examines four species—Mako, Tiger, Hammerhead, and Great White—as never before, and includes fascinating details such as: Sharks are 50-million years older than trees; Sharks have survived five extinction level events, including the one that killed off the dinosaurs; Sharks have electroreception, a sixth-sense that lets them pick up on electric fields generated by living things; Sharks can dive 4,000 feet below the surface; Sharks account for only 6 human fatalities per year, while humans kill 100 million sharks per year. McKeever goes back through time to probe the shark's pre-historic secrets and how it has become the world's most feared and most misunderstood predator, and takes us on a pulse-pounding tour around the world and deep under the water's surface, from the frigid waters of the Arctic Circle to the coral reefs of the tropical Central Pacific, to see sharks up close in their natural habitat. He also interviews ecologists, conservationists, and world-renowned shark experts, including the founders of Greenpeace's

Rainbow Warrior, the head of the Massachusetts Shark Research Program, and the self-professed “last great shark hunter.” At once a deep-dive into the misunderstood world of sharks and an urgent call to protect them, *Emperors of the Deep* celebrates this wild species that hold the key to unlocking the mysteries of the ocean—if we can prevent their extinction from climate change and human hunters. As a college student, Abigail Favale experienced a feminist awakening that reshaped her life and faith. A decade later, on the verge of atheism, she found herself entering the oldest male-helmed institution on the planet--the last place she expected to be. With humor and insight, the author describes her gradual exodus from Christian orthodoxy and surprising swerve into Catholicism. She writes candidly about grappling with wounds from her past, Catholic sexual morality, the male priesthood, and an interfaith marriage. Her vivid prose brings to life the wrenching tumult of conversion--a conversion that began after she entered the Church and began to pry open its mysteries. There, she discovered the startling beauty of a

sacramental cosmos, a vision of reality that upended her notions of gender, sexuality, identity, and authority. Into the Deep is a thoroughly twenty-first-century conversion, a compelling account of recovering an ancient faith after a decade of doubt. A vivid, up-to-date tour of the Earth's last frontier, a remote and mysterious realm that nonetheless lies close to the heart of even the most land-locked reader. The sea covers seven-tenths of the Earth, but we have mapped only a small percentage of it. The sea contains millions of species of animals and plants, but we have identified only a few thousand of them. The sea controls our planet's climate, but we do not really understand how. The sea is still the frontier, and yet it seems so familiar that we sometimes forget how little we know about it. Just as we are poised on the verge of exploiting the sea on an unprecedented scale—mining it, fertilizing it, fishing it out—this book reminds us of how much we have yet to learn. More than that, it chronicles the knowledge explosion that has transformed our view of the sea in just the past few decades, and made it a far more interesting and accessible place. From the Big Bang to that far-off future time, two billion years from now, when our planet will be a waterless rock; from the lush crowds of life at seafloor hot springs to the invisible, jewel-like plants that float at the sea surface; from the restless shifting of the tectonic plates to the majestic sweep of the ocean currents, Kunzig's

clear and lyrical prose transports us to the ends of the Earth. Originally published in hardcover as *The Restless Sea*. "Robert Kunzig is a creator of what oceanographer Harry Hess once referred to as 'geopoetry.' He covers vast tracts of time and space and makes his subjects electrifying."—Richard Ellis, *The Times* [London] "*The Restless Sea* immediately surfaces at the top of the list of journalistic treatments of oceanography. . . .The book opened my eyes to numerous wonders."—Richard Strickland, *American Scientist* "When you head for the coast this summer, leave that trashy beach novel at home. Instead, pack Robert Kunzig's book. Because just beyond your rental cottage lies the restless sea, where three-mile-tall mountain ranges criss-cross the ocean floor, and deep trenches harbor mysterious creatures. . . . The book is easy to read, and will bring you up to date on the startling discoveries oceanographers have made during the past few decades."—Phillip Manning, *The News and Observer* [Raleigh, North Carolina]] "Anyone who loves the sea should read this book."—Sebastian Junger "A strange plague called the 'Gets is decimating humanity on a global scale. It causes people to forget--small things at first, like where they left their keys, then the not-so-small things like how to drive or the letters of the alphabet. Then their bodies forget how to function involuntarily. There is no cure. But far below the surface of the Pacific Ocean, a universal healer hailed as 'ambrosia' has been discovered. In order to study this phenomenon, a special research lab has been built eight miles under the sea's surface. When the station goes incommunicado, a brave few descend through the lightless fathoms in hopes of unraveling the mysteries lurking at those crushing depths...and perhaps to encounter an evil blacker than anything one could possibly imagine"--Page [4] of cover. An autobiographical incantation of adolescent shame, religious masturbation, and the salvation embodied in the creative act. I believe that destiny is the hesitation between whorehouse writing and poetry, Evil and Good. In my body almost deadened to stupidity by its growing length, I am carrying that destiny. —from *In the Deep* A hypnotic account of three days and nights plucked from the summer of 1955, *In the Deep* maps the origins, development, and meaning of Pierre Guyotat's creative vocation. To read it is to inhabit the life of an adolescent boy who is just discovering his calling to write, while also tormented by the questions left unanswered by his Catholic upbringing. Faced with his faith's failure, he feels the need to invent another one—one much darker and conflicted—which he believes will be his destiny. *In the Deep* leads us through the foundations of Guyotat's infamous “beat-sheet”: the masturbatory writing practice that caused a scandal in the 1970s when he first disclosed it, and which—although he has since disowned it—remains fundamental to any understanding of Guyotat's oeuvre. Unlike Guyotat's other works, which deploy the sustained and taxing invention of an altogether other language—and another reality beyond any notion of morality—*In the Deep* is written in an almost classical language, borrowing its timeless rhythmic prose from Latin syntax, and riddled with interrogatives that are part of a French tradition harking back to Rabelais. Nonetheless, as a contemporary *De Rerum Natura*, at once comic and profound, this narrative explores the same issues that run through all of Guyotat's writing: the always precarious grounding to sex, humanity, ethics, and God. Bree Nicholls is close to solving a case, and someone is willing to commit murder to disrupt her investigation.
